01 WHAT IT IS

A real piece. A permanent record.

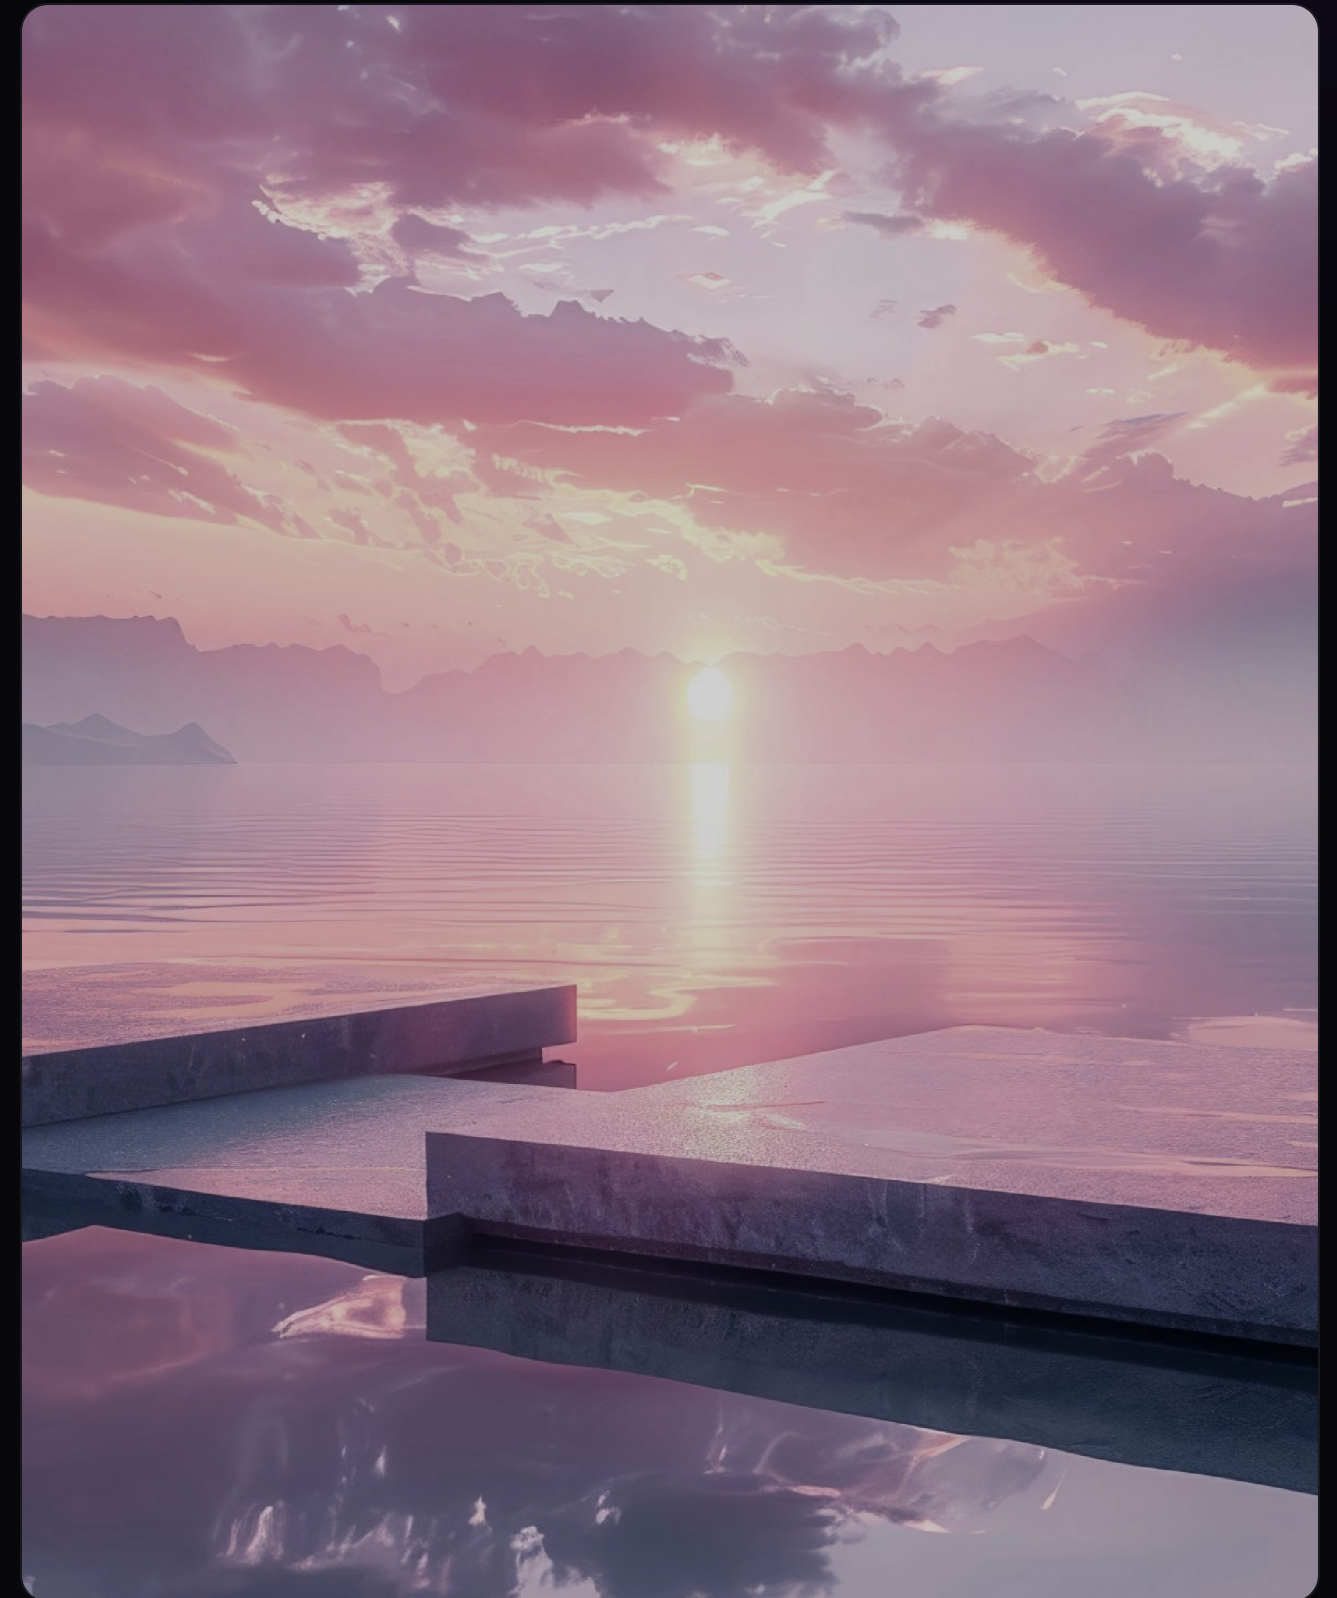

A Phygital pairs a physical piece with a digital record of who owns it. The piece stays with its custodian, such as a gallery or a vault. When it sells, ownership changes on the record and the piece does not have to move.

FOR COLLECTORS

- Ownership on a permanent, public record
- Proof it is genuine: tap its ARK Shard plaque with a phone
- Keep it stored, resell it, or ship it home

FOR YOU

- Money up front when your piece sells
- A cut every time it is resold, set at launch
- A full history that follows the piece and protects its value

A painting hangs in its gallery. A collector buys it on ARKHIVE and becomes the owner on record, while the painting stays on the wall. From there, the new owner can:

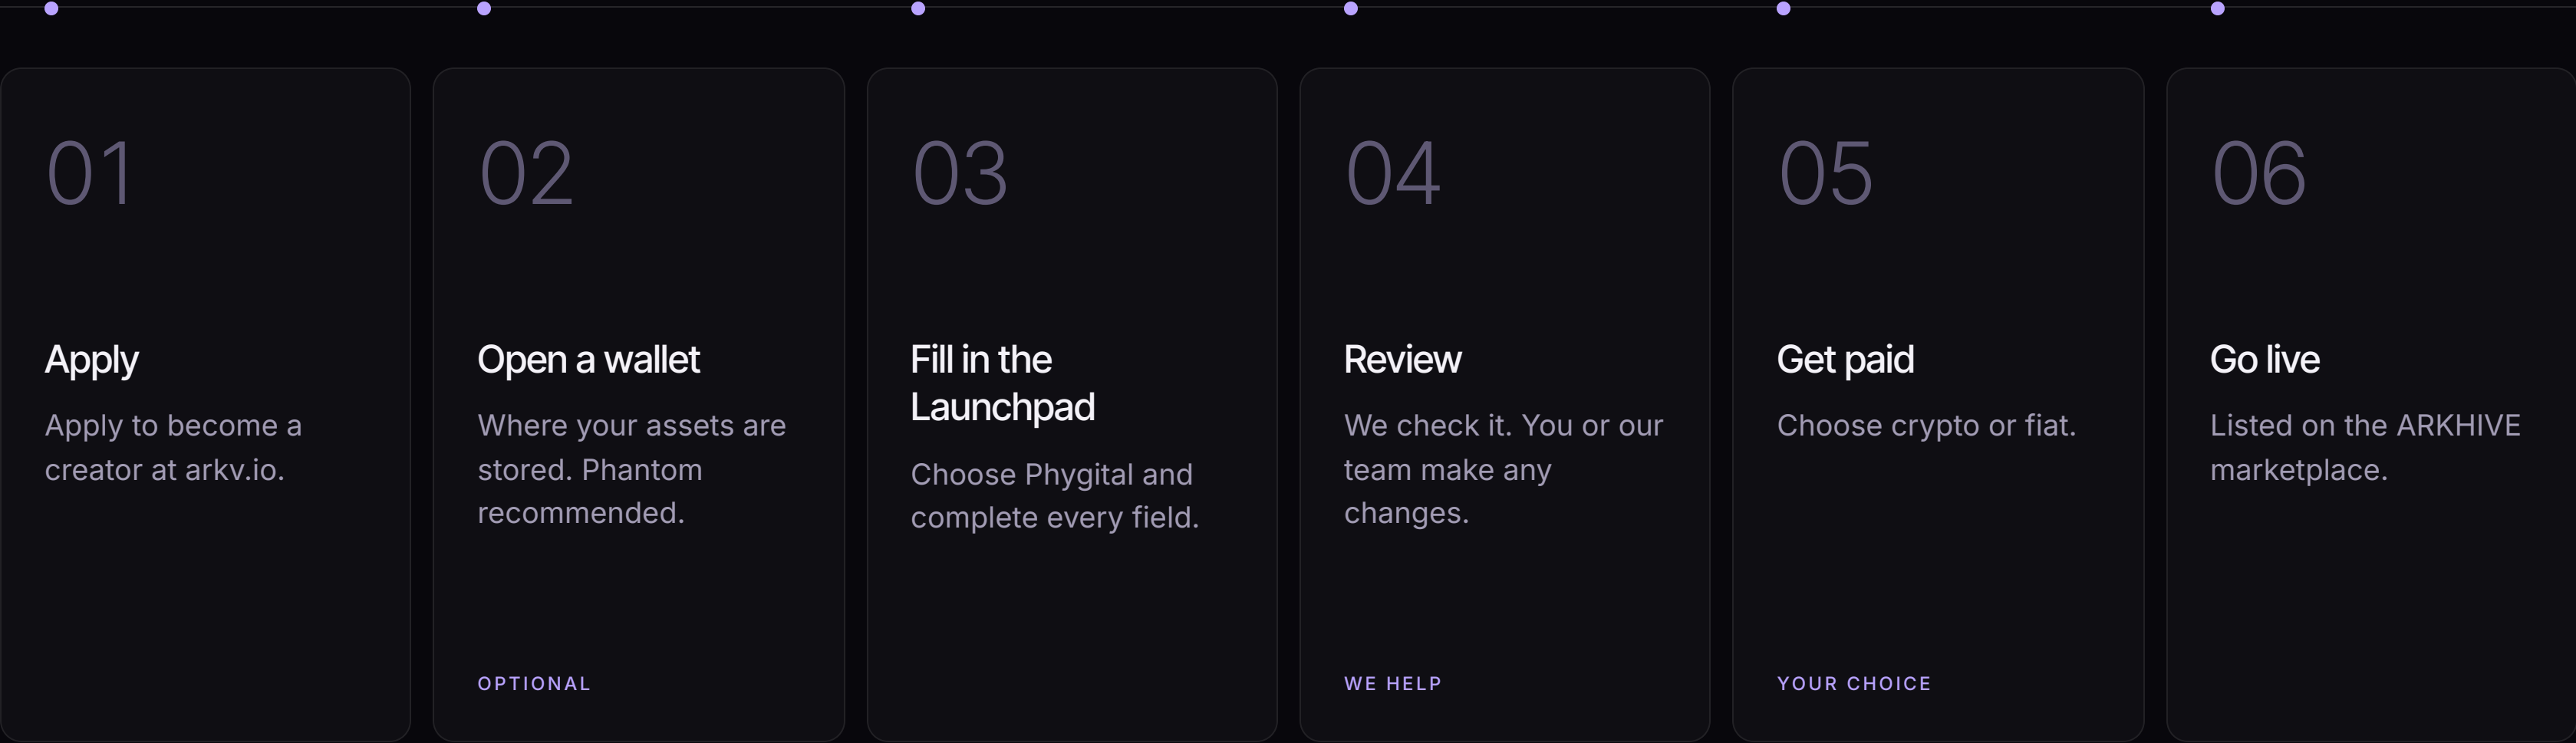

Keep it vaulted
Stay the owner while the gallery keeps it safe.

Resell it
List it on the marketplace at their own price.

Ship it home
Have the painting delivered to them.
